1. Introduction

DFlowERP is a modular ERP system designed for small and medium businesses. The system runs entirely in the browser and does not require additional software installation.

Supported Browsers

Browser	Support
Google Chrome	✔ Recommended
Mozilla Firefox	✔ Supported
Microsoft Edge	✔ Supported
Apple Safari	⚠ Partial support

System Access

The system is available at: `http://[server-IP-address]:3001`

2. Login

Login Steps

- 1. Open your browser and enter the system address
- 2. Enter your **email address** and **password**
- 3. Click the "**Login**" button

Forgotten Password

If you forget your password, contact your system administrator.

Automatic Logout

The system automatically logs out after a period of inactivity for security.

3. Dashboard

The dashboard is the home page after logging in.

What the Dashboard Shows

 Warehouse Management	Number of warehouses, items in stock, draft receipts
 Supply Chain	Number of suppliers, pending orders
 Manufacturing	Active BOMs, work orders in progress
 Point of Sale	Registers, today's sales, today's revenue
 Backup	Active policies, last backup

Navigation

- Click "**View →**" on each card to open the corresponding module
 - Red numbers indicate **warnings** (e.g. items below minimum stock)
-

4. Users

 Access: *SUPER_ADMIN, ADMIN*

Adding a User

1. Go to **Users** in the menu
2. Fill in the form: Email, Password, Role
3. Click "**Add**"

User Roles

Role	Description
SUPER_ADMIN	Full access to everything
ADMIN	User management and settings
MANAGER	Access to all modules without settings
OPERATOR	Work with modules without delete
READONLY	Read only

Changing a Password

1. Find the user in the list
 2. Click the  icon
 3. Enter the new password
 4. Confirm with "**Save**"
-

5. Warehouse Management (WMS)

This module manages warehouses, stock levels, and goods movements.

5.1 Warehouses

Adding a Warehouse

1. Go to **Warehouse Management → Warehouses**
2. Fill in: Code (e.g. WH-01), Name, Address
3. Click "**Create**"

Warehouse Locations

Each warehouse has locations (e.g. A-01, B-02) for precise stock tracking.

5.2 Products

Adding a Product

1. Go to **Warehouse Management → Products**
2. Fill in: Code, Name, Unit of measure
3. Optional: Barcode, Minimum stock, Price
4. When creating, you can enter **Initial stock** and select a warehouse
5. Click "**Create product**"

Barcode Scanner

- Click the  icon next to the barcode field
- Choose mode: **USB/Bluetooth scanner** or **Camera**
- Point the scanner at the barcode

5.3 Stock

Shows current stock by product and location.

Status	Meaning
 Normal	Stock is above minimum
 Below minimum	Stock is below the set minimum

Filter by Warehouse

Use the dropdown at the top right to filter by a specific warehouse.

5.4 Receipts (Goods In)

Creating a Receipt Document

1. Go to **Warehouse Management → Receipts**
2. Select a warehouse and enter the supplier
3. Click "**Create**"
4. In the detail view, add items
5. Click "**Confirm**" to post the receipt

5.5 Issues (Goods Out)

Same process as Receipts but for outgoing goods.

5.6 Movements

Shows full history of all warehouse movements with type (In/Out/Transfer/Adjustment).

5.7 Reports (WMS)

Three sections:

- **Movements** — chart of ins/outs by period
- **Stock** — stock by item with chart
- **Receipts** — receipt documents by period

Period Filter

Choose: 7 days / 30 days / 90 days / Custom (from-to date)

Excel Export

Click the "**Export Excel**" button at the top right.

6. Supply Chain Management (SCM)

6.1 Suppliers

Adding a Supplier

1. Go to **Supply Chain → Suppliers**
2. Fill in: Code, Name, Contact, Phone, Email
3. Click "**Create**"

6.2 Purchase Orders

Creating an Order

1. Select a supplier from the dropdown
2. Click "**Create**"
3. Add items and quantities
4. Change status to "**Sent**" when you send the order

Order Statuses

Status	Meaning
 Draft	Order is being prepared
 Sent	Order sent to supplier
 Received	Goods have been received
 Cancelled	Order was cancelled

6.3 Deliveries

When receiving goods:

1. Go to **Deliveries**
2. Link to a purchase order
3. Confirm received quantities

4. **Confirm** → automatically creates a WMS receipt document
-

7. Manufacturing (MES)

7.1 Bill of Materials (BOM)

A BOM describes what materials are needed to produce a finished product.

Creating a BOM

1. Go to **Manufacturing → BOM**
2. Select finished product and version
3. Click "**Create**"
4. In the detail view, add components (materials + quantities)

7.2 Work Orders

Creating a Work Order

1. Select a BOM and quantity
2. Select warehouse and output location
3. Click "**Create**"

Statuses

Status	Meaning
 Planned	Work order created
 In Progress	Production started
 Completed	Production finished
 Cancelled	Work order cancelled

8. Point of Sale (POS)

8.1 Register (Terminal)

Making a Sale

1. Go to **Point of Sale → Register**
2. Select a register from the dropdown
3. Add products:
 - Click a product to add it
 - Or click "**Scan**" for barcode scanner
4. Select payment method: **Cash** or **Card**
5. Click "**Complete Sale**"

Receipt

After completing a sale, a receipt is shown with:

- Company details (from Settings → Company)
- List of items
- Total amount and VAT (if applicable)

- Payment method

You can: **Print**, **Download**, or continue with **New Sale**

Invoice

Check "**Issue Invoice**" before completing the sale.

8.2 Sales (History)

Shows all completed sales with details.

8.3 Registers (Management)

Manage physical registers in the system.

9. Backup

9.1 Policies

A policy defines when and how backups run.

Creating a Policy

1. Go to **Backup → Policies**
2. Set: Name, Frequency (daily/weekly), Time
3. Click "**Create**"

9.2 Backup History

Shows all completed backups with status and size.

9.3 Restore Points

To restore data from a specific point, contact your system administrator.

10. Settings

 Access: *SUPER_ADMIN, ADMIN*

10.1 Profile

Change your own: Email, Password, Names

10.2 Company

Company data used in receipts and invoices:

- Name, Manager
- EIK/VAT ID, VAT number
- Address, City, Country
- Phone, Email
- Bank, IBAN
- Logo (URL)

10.3 License

Shows information about the current license:

- Validity and expiry date
- Active modules
- Maximum number of users

10.4 System

Technical information about the installation.

11. Roles and Permissions
